SPAM: Import: Queue
The queue SAPKITAB9V-SAPK-74008INSTPI will now be continued according to scenario Standard with phase ABAP_GENERATION.
To avoid known problems, read SAP Note 2158103 "Known problems with Support Packages in SAP NW 7.50 AS ABAP".
The queue will now be imported with the following start options for the remaining modules:
Clean Up: Start in dialog
Note
Start options

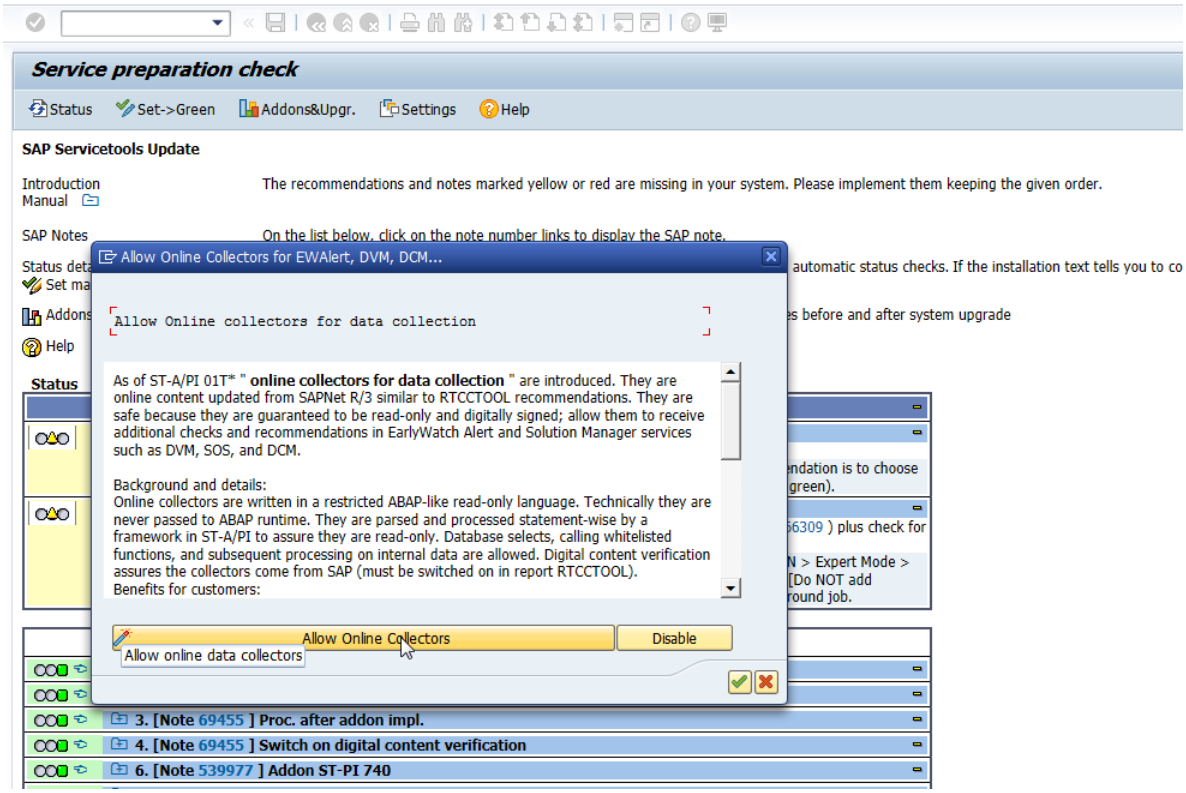

Information on Modified Objects
Call SPAU
Continue
Phase RUN_SPAU_?: Information on Objects Modified in System
The import was completed successfully. This means that all the Repository objects that were imported are now activated in the shipped original state.
The system detected however that 3 of the Repository objects in the Support Packages have been modified in your system
Check whether you want to retain or restore these changes you have made. To do this, call transaction SPAU (choose 'Call SPAU').
For more information about performing the modification adjustment, see 'Modification Adjustment Help'.
If you want to continue importing the queue immediately, choose 'Continue'.
