Quedo buggeado, se cancela el wizard

Solution

Preventative solution: Implement the correction from this SAP Note or import the relevant support package.

Retrospective solution: Implement the correction from this SAP note and run the report SAPRUPGM. Use transaction SPAU to determine whether (other) SAP Notes have to be adjusted.

For load-based upgrades, this error has been corrected in SUM 1.0 SP22, SUM 2.SP0, and SUM 2.0 SP2.

Si es medianamente nuevo, te genera las RFC solas y todo con un tasklist

Está todo o la gran mayoría de notas SP

Procedimiento update snote.docx

Básicamente es:

-Cambiar un parámetro de instancia

-Reiniciar el sisitema

-Hacer los pasos manuales que están en el word

-Implementar la nota 2836302

- Seguir el wizard

-Uno de los últimos pasos llama una tasklist que crea las RFC (Ahí le definís el usuario y contraseña)

-Probar la SNOTE

-FIN

-Hay que ponerle un usuario técnico a las RFC, porque si no, no va a funcionar, lo creas desde el OSS directo
